

ROLL-NECK BEARINGS

FOUR-ROW TAPERED ROLLER BEARINGS

Bore Diameter 100 – 939.800mm..... B338

FOUR-ROW CYLINDRICAL ROLLER BEARINGS

Bore Diameter 100 – 920mm..... B340

DESIGN, TYPES, AND FEATURES

Four-row tapered roller bearings and four-row cylindrical roller bearings used for rolling-mill roll necks are easy to service and check, and are designed to have the highest load rating possible for the limited space around roll necks. Also, they are designed for high speed to satisfy the demand for fast rolling.

In addition to the open type (KV) four-row tapered roller bearings listed in this catalog, sealed-clean type four-row tapered roller bearings are also available. Please refer to “Large-Size Rolling Bearings” catalog (CAT. No. E125) or “Extra-Capacity Sealed-Clean™ Roll Neck Bearings” catalog (CAT. No. E1225) for more detailed information.

FOUR-ROW CYLINDRICAL ROLLER BEARINGS (CYLINDRICAL BORES)

When they are used on backup rolls of four stage rolling mills, the tolerances for roll neck diameters are shown in Table 5. For the fitting between the bearing and chock bore, we recommend G7.

For the fitting of four-row cylindrical roller bearings on the roll necks of other rolling mills, Table 9.2 (Page A84) and Table 9.4 (Page A85) usually apply.

Table 5 Recommended Backup Roll Neck Tolerances

INTERNAL CLEARANCES

FOUR-ROW TAPERED ROLLER BEARINGS

The radial internal clearances in four-row tapered roller bearings (cylindrical bores) used on rolling mill roll necks with a loose fit are C2 or often smaller than C2. The NSK standard clearances for four-row tapered roller bearings for roll necks are shown in Table 6. Depending on the operating conditions, special radial clearance selection may become necessary, please contact NSK in such a case.

The internal clearance in four-row tapered roller bearings is padadjusted for individual bearing sets, therefore it is necessary to use each part of a given set by observing mating marks when assembling them.

FOUR-ROW CYLINDRICAL ROLLER BEARINGS

Please contact NSK regarding internal clearance.

- Remarks**
1. For four-row cylindrical roller bearings not listed above, please contact NSK.
 2. Four-row cylindrical roller bearings are designed for specific applications, when using them, please contact NSK.

Bore Diameter 370 – 920 mm
